Why a DailyMed Pharmacist May Contact You

You may already know about the **DailyMed** program that's aimed at improving care for Medicaid members who take six or more medications. The **DailyMed** pharmacy program sends your patients a 30-day supply of their medications, over-the-counter drugs and vitamins in pre-sorted packets that are marked with the day, time and directions on how the medication should be taken.

DailyMed clinical pharmacists work closely with primary care physicians to coordinate care and closely monitor the safety, efficacy and compliance of the medication therapy. A **DailyMed** pharmacist will review all medications to ensure against adverse interactions and other medication related problems. **DailyMed** pharmacists also provide extensive medication therapy management and counseling to participating members to help improve outcomes.

You may receive a call from a **DailyMed** pharmacist regarding aspects of your patients' medication regimen. This is to ensure accuracy and that your patients take the medications exactly as you directed. **DailyMed** is free for your patients who are BlueChoice HealthPlan Medicaid members. Please encourage them to consider this service by calling **DailyMed** pharmacy at **1-866-720-9855** for details.

Dispensing a 30-day supply of medications in the **DailyMed** compliance dosage packaging coupled with the drug regimen reviews ensures adherence to the five components of medication safety: the right patient, right drug, right dose, right route, and right time.

Working closely with **DailyMed** pharmacists will help improve your patient outcomes and helps reduce health care costs. Thank you for continuing to help us improve our members' quality of care.

If you'd like more information on the **DailyMed** program, please visit www.DailyMedRx.com or call the Customer Care Center at: **1-866-757-8286**.
